#DontGoThere

Let's save wildlife at Tipner West

Portsmouth City Council want to:

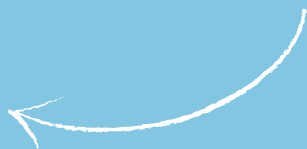

- Breaks legal safeguards to build 4,000 houses over intertidal mudflats with the highest legal protections for nature.
- Destroy 67 acres of intertidal mudflats that fight climate change by storing carbon.
- Devastate an area that supports dark-bellied brent geese, dunlin, black-tailed godwits, marine invertebrates and juvenile sea bass.

We need to see a future for Tipner West that protects wildlife and provides greenspace for Portsmouth residents.
