

# Protect your pooch

**Do you use spot-on tick and flea treatments? These treatments can wash off in rivers, reducing your dog's protection and harming wildlife.**

**A cooling vest can be a good alternative for walks on hot days. You can also wet your pet's head or keep a shallow paddling pool at home.**

**If your dog loves a dip, ask your vet about tablet treatments, as these don't wash off. Thank you for protecting your pooch and our wildlife!**
